

2021 STEM EDUCATION SUMMIT

Building a Coalition for Attracting and Retaining a Diverse STEM Teaching Workforce

The Smithsonian Science Education Center, in a public-private partnership with Shell Oil Company will host a virtual STEM Education Summit to support school and district teams as they plan to address the challenge of increasing diversity within the STEM teaching workforce.

Guided by discussions and presentations led by a diverse cadre of STEM education and equity professionals, and directly supported by a mentor strategically matched against the composition and unique needs of each team, selected school and district teams will develop a comprehensive logic model that identifies action steps toward achieving their proposed idea in recruiting and retaining teaching talent from underrepresented populations.

Apply today!
